

# Balance HCL

- Support digestion
- Helps in Digestion of Proteins
- Destroy microorganisms in the food particles
- Helps in absorption of Vitamin B12

It contains 500 milligrams of betaine hydrochloride (HCL) and a proprietary blend of natural, key ingredients. The HCL works by increasing the level of hydrochloric acid in the stomach, which is essential for healthy digestion and nutrient assimilation. Your body requires normal hydrochloric acid levels in order to properly absorb and digest certain foods, primarily proteins and amino acids. Each Balance-HCL tablet also contains natural herbs such as gentian, peppermint, cardamom and dandelion to aid in overall digestive health. Plus, Balance-HCL has high-potency vitamin B6, and is an excellent source of vitamin B3.

Balance-HCL is recommended those showing a decreased ability to digest proteins, which can be observed in blood work as decreased or increased total protein. It's also an excellent solution for many other digestive upsets.

## Supplement Facts

1 Tablet Contains:

- Niacin (as niacinamide) 17 mg
- Vitamin B6 (as pyridoxal 5' phosphate) 5 mg
